課程大綱 Course Outline

This course can be partitioned into four parts.
Part One is an introduction to financial markets, instruments, and trading of securities. This part also describes the mutual fund industry.
Part Two is a fairly detailed presentation of “modern portfolio theory.” This part treats the effect of diversification on portfolio risk, the efficient diversification of investor portfolios, the choice of portfolios that strike an attractive balance between risk and return, and the efficient market hypothesis.
Part Three covers securities analysis and valuation. It is devoted to debt markets, equity markets, and derivative assets, such as options and futures contracts.
Part Four is an introduction to active investment management. This part discusses the role of active management in nearly efficient markets, considers how one should evaluate the performance of managers who pursue active strategies.

資源需求評估（師資專長之聘任、儀器設備的配合．．．等）
Resources Required (e.g. qualifications and expertise, instrument and equipment, etc.)

Teachers with backgrounds in finance-related fields
Notebook, Projectors, Security market database
