課程大綱
Course Outline

This course will introduce the general concepts and key elements of Total System Innovation Management, which emphasizes both a total system perspective of the innovation management process and a rigorous and disciplined approach to the development of the individual elements of the process. The general concepts include a new human need model for innovation motivation and a joint investment perspective for innovation development and implementation. The key elements of effective innovation management include Productive Creativity, Impactful Marketing, and Adaptive Organization. The course will especially focus on impactful marketing and elaborate on the marketing application of innovation. In addition to the general concepts, the course will present practical tools and real-world case studies for the application of these concepts to innovation management and marketing.
