課程大綱 Course Outline

The teaching method of this course is twofold. One is better to understand the economic theory of health and healthcare. The emphasis will be on key economic concepts that health economists use to analyze health and healthcare markets. We will have lectures and discussions on several economic models in detail, including models of health services, demand for healthcare and insurance, and the implication process of National Health Insurance in Taiwan. The second method of the class is to learn to evaluate and interpret empirical findings in health economics. We will have literature reviews in detail and case discussion on current events to help students.

資源需求評估（師資專長之聘任、儀器設備的配合．．．等）
Resources Required (e.g. qualifications and expertise, instrument and equipment, etc.)
