課程目標 Course Objectives					
政治生態學是一個跨學科的研究領域，關注社會、環境與權力之間的動態關係。它強調，環境問題並非單獨存在，而是深植於政治、經濟與社會脈絡之中，必須在更廣泛的權力結構與歷史背景下理解。此領域融合地理學、社會學、人類學與環境科學的理論與方法，探討自然與社會如何相互形塑與變遷，並分析環境治理對不同社群的影響，特別是權力關係如何決定資源分配與環境決策。 Political ecology is an interdisciplinary research field that examines the interactions between society, the environment, and power. It emphasizes that environmental issues cannot be understood in isolation but must be analyzed within political, economic, and social contexts. This field integrates theories and methodologies from geography, sociology, anthropology, and environmental science to explore the dynamic relationships between nature and society. It also investigates how environmental governance impacts different communities, shedding light on the socio-political dimensions of ecological change and resource management.
