課程目標 Course Objectives					
<p>This course addresses essential concepts, issues, and practicalities of assessment in the classroom as well as standardized language tests for different levels of schooling. Since assessment is an integral aspect of the pedagogical process, it is intended to serve simply as an introduction to the complex field of language assessment and summative evaluation. The first half of the course introduces principles and issues. Students are to take a brief look at large-scale and standards-based testing. The second half is focused directly on the classroom, and on what the teacher can do to develop principled, effective, informative assessment in their own teaching process. Alternatives in assessment, such as portfolios, journals, conferences, observation, interviews, form-focused assessment, and self- or peer-assessment will also be briefly discussed.</p>
