先修課程 Prerequisite							

課程描述 Course Description

This is an introductory course in Microeconomics. It focuses on helping students to understand the basic principles of Microeconomics and the applications of theories in daily life. Since our life is in large part about making choices subject to limited resources, this course will help you see through how rational decisions are made by individuals/firms/government and how it might be changed for the better. More importantly, how the market—where 'supply' and 'demand' interact — works and sets its price will be further elaborated. Despite the fact that the efficient market is not always the case, the government will be proved to be the solution when market failure (such as externalities) occurs

課程目標 Course Objectives

基本經濟學原理乃當前現代國民應具備之知識,亦為其他許多商學院及管理學院科目之基礎先修學科。本課程目標即為同學提供良好基礎,充實其知識,使更了解經濟社會現象。
