課程描述 Course Description			
<p>Econometric Analysis is the first-year graduate course in econometrics. The course aims at equipping the students with the knowledge for econometric theory and advanced empirical analysis, especially in the fields of finance and economics. Thus, the focus is placed upon methodology rather than proving statistical theorems. I adopt the book written by William H. Greene for its broad coverage and clear exposition.</p> <p>While students may have only limited exposure to econometrics, I shall allocate parts of the course on regression model specification and testing as is covered in Stock and Watson (2007). They are extremely useful in real empirical analysis.</p>			
課程目標 Course Objectives			
<p>為本所必修課程之一，本所學生必須具有計量經濟學的訓練才能，根據經濟理論作實證分析，預測等分析，為本所特色之</p>
