授課教師 Instructor	/蕭育仁/蕭朝興						
先修課程 Prerequisite							

課程描述 Course Description

The purpose of this course is to study the firm's investment, financing, and dividend decisions. The primary goal is to teach students how to use financial information and theory in financial management and financial decision making. The main readings for the course are Corporate Finance, Second Edition, Berk, J., and DeMarzo, P. Besides, the class will combine lectures with detailed paper discussions and presentation. In some session, I will assign you to deliver a presentation and lead the discussion. A power point presentation is required. After presentation, the power point presentation file needs to be handed in. An important part of the class, however, is the research discussion. All students are expected to carefully read the main papers and actively participate in the discussion. The discussion will assume that everybody has read the books and papers. You are also expected to attend every class, unless you have an excused absence due to illness or an emergency. If you must miss a class session, it is your responsibility to notify me by email, if possible in advance of class indicating the reason for the absence. Failure to do so may result in an unbounded random penalty to your class participation grade. There are a total of 6 homework assignments. Your homework grade is based on the 5 best assignments, so you may choose to drop one of them. Homework assignments are due at the beginning of class. The course Midterm and ends with a 3-hour, closed-book in class-exam. Therefore, your grade for this class will be determined by class participation and discussion (10%), homework assignments (15%), presentation (15%), Midterm-examination (30%), and a Final Examination (30%).

課程目標 Course Objectives

This course including the latest developments in corporate finance theory and practice that help students to apply theory to solve financial problems.

	系專業能力 Basic Learning Outcomes	力相關性 Correlation between Course Objectives and Dept.'s Education Objectives
A	具備企業管理理論的核心專業知識。 Core knowledge of theories related to business management	•
