課程描述 Course Description				
<p>This course aims at refreshing the students with the statistical methods frequently used in management science and developing the skills for quantitative analysis. Mastering one statistical software is another goal.</p> <p>One can never really master statistics and econometrics without getting his/her hand dirty. Real data using some statistical package is considered as an essential part of this course. I shall give empirical data analysis during the lectures and assign computer-related home work. For this purpose, I shall teach and ask students to learn and use <math>\textit{R}</math>, a powerful statistical and yet free package. It can be downloaded from</p> <p><a href="http://www.r-project.org">http://www.r-project.org</a></p>				
課程目標 Course Objectives				
<p>協助研究所新生複習統計分析的基礎理論及熟悉統計軟體的使用，奠定學習統計分析及其他數量分析課程的基礎。 This course aims at refreshing the statistical methods frequently used in management science and developing the skills for quantitative analysis. Mastering one statistical software is another goal.</p>
