課程名稱(英文) Course Name in English	Statistics (I)								
科目代碼 Course Code	IB2140AB	系級 Department 學二 (& Year		開課單位 Course-Offering Department	資訊管理學系				
修別 Type	學程 Program	學分數/時間 Credit(s)/Hour(s)			3.0/3.0				
授課教師 Instructor	/林金龍								
先修課程 Prerequisite									

課程描述 Course Description

H. G. Wells, an English author and historian, predicted over 100 years ago that quantitative reasoning will be as necessary

for effective citizenship as the ability to read. He could not have been more correct especially for students

in business and economics today who need to acquire the knowledge to organize, analyze, extract and then transform data to present the information. These basic statistical skills and methods are essential for making proper business and personal decisions.

This course is the first semester of a one-year undergraduate statistics. It aims at equipping the students with

the ability to describe data sets using graphs and numerical summaries, to use probability rules in problem solving, to

supply inferential statistical techniques in decision making for business and real life situations. Topics studied include descriptive measures for empirical data, theory of probability, probability distributions,

sampling distributions of statistics from large and small samples, estimation theory, hypothesis testing, correlation,

and regression.

One can never really master statistics without getting his/her hand dirty with real data. Analyzing real data using some statistical package is considered as an essential part of this course. I shall give empirical data analysis during the lectures and assign computer-related home work. For this purpose, I shall teach and ask students to learn and use R, a powerful statistical and yet free package. It can be downloaded from

http://www.r-project.or

課程目標 Course Objectives

介紹統計推論的概念與各種統計分析方法,引導學生了解統計學在管理決策等方面之應用。

系專業能力

Basic Learning Outcomes

課程目標與系專業能 力相關性 Correlation between Course Objectives and Dept.'s Education Objectives

A	具備經濟學、會計學、統計學及數學的基礎能力Basic knowledge of the financial theory Economics, accounting, statistical and mathematical											
В	具備財	オ務金融基本學理Understanding of the development of the financial disciplin										
С	具備運	用財務金融學理進行分析能力Basic knowledge of financial theory analysis										
D		資料整理、書面呈現或口頭報告之能力Basic knowledge of documentation and entation skill										
Е	_	策Bentation Skiii 構財經時事基本分析能力Capabilities for financial analysis of current affairs										
F	具備電腦程式運算及應用基本能力Ability of computer programs, algorithms and applications											
G	C 具備英語閱讀溝通協調等基本能力English reading ability of communication and											
。 coordination												
授課進度表 Teaching Schedule & Content												
										 觜註Remarks		
	1	Introduction to									д спомет по	
	2	Introduction to statistics and R Describing data frequency tables, frequency distributions and graphic presentation										
ć	3	Describing data: numerical measure										
4	4	Describing data: displaying and exploring data										
Ę	5	A survey of probability concepts (1/2)										
(3	A survey of probability concepts (2/2										
7	7	Discrete probab	ility distrib	outions	(1/2)							
8	3	期中考試週 Midterm Exam										
(9	Discrete probab	ility distrik	outions	(2/2)							
1	0	Sampling metho	ds and the ce	entral l	imit th	eorem (1/2)					
1	1	Sampling metho	ds and the ce	entral l	limit th	eorem (2/2)					
1	2	Estimation and	confidence ir	ntervals	s (1/2)							
1	3	Estimation and	confidence ir	ntervals	s (2/2)							
1	4	One-sample test	s of hypothes	sis (1/2	2)							
1	5	One-sample test	s of hypothes	sis (2/	(2)							
1	6	Two-sample tests of hypothesis (1/2)										
1	7	Two-sample tests of hypothesis (2/2)										
1	8	期末考試週 Final Exam										
教學策略 Teaching Strategies												
✓ 課堂講授 Lecture
