課程描述 Course Description

This is a graduate course in international trade theory and policy analysis for M.A. and Ph.D. students in economics. A modest background in mathematics and microeconomic theory will be assumed. The objective is to provide a self-contained introduction to modern work on international trade theory and policy. Specific topics include: strategic trade policy, international trade institutions and rules, the policy economy of trade policy, gravity model, direct foreign investment and multinational firms, and outsourcing.
