修別 Type	學程 Program	學分數/時 Credit(s)/Hou			3.0/3.0			
授課教師 Instructor	/林慧菁							
先修課程 Prerequisite								

課程描述 Course Description

This course is a continuation of Statistics in Psychology II. It aims to provide students with an introduction to the science of making sense out of numerical data. Knowledge of statistics provides statistical literacy that enables people to understand and make sensible judgments based on the analysis of numerical information. This course is designed to teach students how to apply statistical concepts and interpret the results of a variety of statistical techniques from both descriptive and inferential statistics. The major contents covered include estimation and confidence intervals of means, analysis of variance, post hoc procedures, two-way ANOVA, correlation and simple regression, chi-squares tests for goodness of fit and independence, and some simple nonparametric procedures.

課程目標 Course Objectives

To allow students to become more informed persons who can critically evaluate claims that are made in scientific (and less formal) settings.

To develop an appreciation for the conceptual bases that support statistical evaluation.

To learn how to interpret and perform several fundamental statistical procedures, as well as to evaluate situations and decide which procedures are appropriate.

To gain enough knowledge of basic statistical procedures to enable students to apply it to more advanced topics that they will study later in their career.

授課進度表 Teaching Schedule & Content

週次Week	內容 Subject/Topics	備註Remarks		
1	Course introduction and review of descriptive statistics(logic of inferential statistics, z distribution and sampling distribution), Review of hypothesis testing			
2	Ch 9: t statistic	First Homework Assignment, due next week Homework: Ch 6-8		
3	Ch 9: t statistic (continued) The t Test for Two Independent Samples: Ch 10	2nd Homework Assignment, due next week Homework: Ch 9		
4	Ch 10 (continued) The t Test for two Related Samples: Ch 11			
5	Ch 11 (continued)			
6	Introduction to Analysis of Variance: Ch 12			

7	Ch 12 (continued) ANOVA: Repeated Measure: Ch 13									
8	Ch 13 (continued) Review									
9	期中考試週 Midterm Exam									
10	ANOVA: Two-factor Independent Measure: Ch 14									
11	Ch 14 (continued)									
12	Correlation: Ch 15 Ch 15 (continued)									
13	Regression: Ch 16 Ch 16 (continued)									
14	Chi-Square Statistic: Test for Goodness of Fit and Independence: Ch									
15	Ch 17 (continued)									
16	Binomial Test: Ch 18									
	Ch 18 (continued)									
17	Review									
18	期末考試週 Final Exam
