課程描述 Course Description

Econometric Analysis is the first-year graduate course in econometrics. The course aims at equipping the students with the knowledge for econometric theory and advanced empirical analysis, especially in the fields of finance and economics. Thus, the focus is placed upon methodology rather than proving statistical theorems. I adopt the books written by William H. Greene as the textbook for its broad coverage and clear exposition as well as Christian Kleiber and Achim Zeileis's Applied Econometrics with R which is excellent for practitioners. I shall allocate parts of the course on regression mode specification and testing as is covered in Stock and Watson (2015). They are extremely useful in real empirical analysis. In addition, I also include some chapters of the lecture notes written by Bruce Hansen, which is an excellent textbook for graduate econometrics. While students may have only limited exposure to econometrics, I shall allocate parts of the course on regression mode specification and testing as is covered in Stock and Watson (2007). They are extremely useful in real empirical analysis.

課程目標 Course Objectives

The students must have the ability of training econometrics, according to economic theory to analysis empirical and forecast.

	系專業能力 Basic Learning Outcomes	課程目標與系專業能 力相關性 Correlation between Course Objectives and Dept.'s Education Objectives			
A	具備財務金融的分析能力Understanding the financial analysis.	•			
В	具備企業財務管理專業能力Capabilities for business financial management.	•			
С	具備英語閱讀溝通協調等能力English reading ability of communication and coordination.	•			
D	具備獨立研究之技能,以進行財金議題研究Independent research skills to research financial issues.	•			
Е	具備個人投資理財能力Investment and financial management.	0			
F	具備電腦程式運算及設計能力Ability of computer programs, algorithms and application.	•
