課程描述 Course Description				
This class assumes no prior education in finance. It develops fundamental models of valuation and investment from first principles and applies them to problems of corporate and individual decision making. Topics covered portfolio theory and the trade-off between risk and return. It presents several asset pricing models, the Capital Asset Pricing Model, the Arbitrage Pricing Theory, the Three-Factor Model, and recent applications to the calculation of the firm's cost of capital. Students are introduced to the fundamental concepts of finance: the time value of money, portfolio theory and the determinants of expected security returns.				
課程目標 Course Objectives				
To provide the student with an introduction to the field of finance and gain an appreciation of role of financial markets and institutions in the economy as well as an introduction to the responsibilities, concerns and methods of analysis employed by the corporate financial manager.
