課程描述 Course Description				
<p>This is an intensive course for risk analysis; primarily focus on financial institutions which banking industry is part of it. Financial risk management is becoming crucially important for any financial institutions nowadays. (I would rather say it is not only important for financial institutions, but also for any corporations.) In last decade, numerous examples prove the importance of financial risk management. One of the well-known example is the collapse of the England oldest bank which served the royal families for hundreds years. After joining WTO, more financial products will be introduced into Taiwan market. Therefore, demand for financial risk management will rise. Our intention is to provide a solid foundation for students in financial risk management for financial institutions. The other even more important goal for this class is to prepare student to take FRM exam. After taking this class, the student should be able to sit for the FRM exam without any difficulty. The learning process just begins when students finish this class since the financial industry evolves swiftly and constantly. That is the reason the outside class readings are strongly recommended to keep up with the latest developments in the financial industry. Life is tough; you have to keep on learning to stay afloat in this information age.</p> <p>Class etiquette: Experience indicates that students with regular attendance of class have higher grades than those who did not. Followings are basic class etiquette. No iPad or laptop computer is allowed to use by students during lecture, unless pre-approval by me. Turn off your mobile phone before class. No loud chatting allowed in the class. Having food or drink in the class is not encouraged. Any irrational behavior in the class will not be tolerated. Any violation of the class etiquette will be penalized by reduction in your grade.</p> <p>The participation includes following specific activities student has to engage.</p> <ol style="list-style-type: none"> <li>a. Before lecture, one randomly selected student will briefly explain the topic going to be covered in English. Minimum of 5 minutes is required.</li> <li>b. Student will solve the exercise in class in English.</li> <li>c. Student is responsible for answering my question in English.</li> </ol> <p>Three strikes, you' re out: If you missed three classes without any official excuses, your semester grade will be C- or below C-, depending upon your overall class performance. You need an official document for not attending a class. All the leave of absence must be filed through the college filing system. No oral or email excuses will be accepted.</p>
