課程描述 Course Description					
This course introduces and practices the mathematical theories for economic analysis. It will provide basic concepts and focus on the static equilibrium and optimization analysis, so that students are able to tackle economic problems using mathematical methods.					
課程目標 Course Objectives					
The course covers the mathematical structures commonly found in economics. It provides the basic mathematical background needed in quantitative economic analysis. The main focus of the course is the study of optimization theory (with and without differentiability) and its applications to economics.
