Objective

This is an advanced Economics course. It covers a broad range of topics in the fields of Monetary Economics and Finance. In this course, we will discuss the financial and banking system including the issues of money, interest rates, financial structures...etc. We will also cover the topics of central banking and monetary theory. After this course, you will have a better understanding of how the financial system functions in the economy, how the central bank conducts its monetary policy, and the theories behind those policies.

Prerequisites Principle of Economics (1 year)

Textbook

The Economics of Money, Banking, and Financial Markets, 12th Edition, Frederic S. Mishkin, Pearson Education. (Required)

Class Meeting Time and Place

Friday 9:10 A.M. ~ 12:00 P.M., Room B109,
Humanities and Social Sciences Building II

Grading Policy

Exams: 70%. There will be one mid-term exam and a comprehensive final examination. The mid-term exam will account for 30% and the final exam will account for 40% of your total grade.

General performance: 30%. It includes: quizzes, homework, class participation and presentation...etc. The purpose of these activities is to help you assimilate the materials taught in the class and prepare for the exams. Please note that late homework will not earn you any credit.

Importance: You should take the exams with your class. If you missed the exam for acceptable excuses such as a university-sponsored excursion, a critical illness or a death in your family, you must talk to me within a week after the exam to arrange for a make-up exam or receive no credit for that exam.

Suggestions

Since this course is closely related to the real world economic events, I encourage you to pay more attention to the financial news and related information on the web or in the newspapers and business-type magazines. The exams might ask you to analyze the related news reports.
