課程名稱(中文) Course Name in Chinese	時間序列分析			學年/學期 Academic Year/Semester		112/2	
課程名稱(英文) Course Name in English	Time Series Analysis						
科目代碼 Course Code	AM75220	系級 Department 博士 & Year		開課單位 Course-Offering Department	應用數學系		
修別 Type	選修 Elective	學分數/時 Credit(s)/Hou		3.0/3.0			
授課教師 Instructor	/黄灝勻						
先修課程 Prerequisite							

課程描述 Course Description

This course delves into the fundamental principles and advanced techniques of time series analysis, aiming to equip students with the ability to analyze, forecast, and interpret time series data. By combining theoretical learning with practical application, students will gain a comprehensive understanding of time series analytical methods. The course integrates theoretical lectures with case study analyses, aiming to enhance students' critical thinking abilities and problem-solving skills. It is suitable for students or professionals in the fields of statistics, economics, and finance. Through this course, students will be able to independently conduct analysis and forecasting of time series data and apply the knowledge in various practical applications.

課程目標 Course Objectives

介紹時間序列分析方法及其理論推展

Introduction of time series models and their mathematical basis.
