課程描述 Course Description					
The course covers the effective integration of financial theory and practice. It will explore the rapidly evolving theory of finance as it relates to a corporation's investment in assets and finance. Financial analysis and reasoning will be applied to problems faced by management.					
課程目標 Course Objectives					
The course studies corporate financial decisions in an international setting. We start with basic concepts of international financial markets, such as the global foreign exchange market and its operations, the international capital market, the global bond market, the international equity markets, and cross-border portfolio investment. Then, we discuss corporate financial decision issues including risk management, investment, capital structure, capital budgeting, and cash management in the global context.
