課程描述 Course Description

This course is a general introduction to the basic methods of social science research. This course as designed has a two-fold focus: 1) to give students a working knowledge of issues and techniques of measurement in empirical research, and 2) to acquaint students with commonly used research designs and their underlying logical rationales. This broad-based objective will be achieved by acquainting the student with the basic constructs and language of scientific research, with the taxonomy of research designs available, with the types of studies generally used in social science research and with the basic forms of data analysis.

課程目標 Course Objectives

To understand the basic methods of social science research. To critically evaluate research studies. To understand the design, execution, analysis, and application of social science research.
