## 課程目標 Course Objectives

One very important idea in this class is that EFL listening courses must make use of students' prior knowledge in order to improve listening compre?hension. Then the teachers need to help them apply that knowledge and those interests so they can become effective listeners.

Two issues will wind through this class. The first is the necessity of supporting students' learning. Another issue will be learning motivation. Both issues are united by a focus on the EFL learners how to learn and teachers how to teach. Teachers need to capitalize on the knowledge and interests the EFL learners already possess.

This class also considers the similarities and differences between listening and reading (comprehensible input), and then looks specifically at why the activation of prior knowledge is perhaps even more important in listening than in reading comprehension. Finally, there is a concrete example of activating prior knowledge in listening materials for discussion in class.
