#### 課程描述 Course Description

This course will introduce the optical polarizing microscopy and its applications to geosciences, environmental studies, and education. The content will focus on applied topics related to minerals and rocks. Students will gain practical experience through hands-on exercises. No prerequisites. We will work on some fun projects using the methods introduced in this course. A short field trip for (rock) sample collecting will be scheduled.

#### 課程目標 Course Objectives

本課程旨在介紹光性礦物學岩象分析的技術原理、實作與應用。光性岩象分析主要以偏光顯微鏡(polarizing microscope)及其週邊輔助具為主為儀器設備,為研究地質構造與礦物岩石科學的基礎工具,亦可應用在材料科學、環境地質與醫學藥學等應用領域上。期望學生於修習本課程後能利用此技術於論文研究或未來專業應用等方面。 This course aims to introduce the principles and applications of optical petrography. Students will learn how to use a polarizing microscope to identify minerals and rocks. This method is a traditional tool in geological sciences, but it can also be applied to other fields, such as materials science, archeology, environmental studies, forensic science, and medical sciences. Students will do some fun and meaningful projects and gain hands-on experience.
