課程描述 Course Description				
<p>Digital content is any type of content that exists in the form of digital data. Also known as digital media, digital content is stored on either digital or analog storage in specific formats. Forms of digital content include information that is digitally broadcast, streamed or contained in computer files. Viewed narrowly, types of digital content include popular media types, while a broader approach considers any type of digital information (e. g. digitally updated weather forecast, GPS map and so on) as digital content. Digital content has seen an increase as more households now have access to the Internet. Therefore it is easier for people to receive their news and watch TV online, rather than from traditional platforms. Because of this increased access to the Internet, digital content is commonly published through individuals in the form of ebooks, blog posts, and even Facebook posts.</p>
