課程描述 Course Description

This course will introduce the basic optoelectronic properties of organic materials and the technology of their devices (i.e. OLED). The instruction of this course is mainly based on lecture notes and supplemented by HW and reports in related to journal papers. It is hoped that students who want to engage in organic electronics and components in the future can build up relevant basic knowledge after taking this course. Besides, office hour is 1:00-3:00 PM every Monday.
