課程描述 Course Description

This is a graduate-level course focused on empirical research in microeconometrics. We will explore data processing methods and various econometric models, with a primary emphasis on cross-sectional data and panel data.

Topics will include software operation, data management, and empirical estimation for microeconomic data. For each topic, there will be quick in-class exercises and homework assignments for practice. Students will be trained to become proficient in using econometric softwares and to develop the skills necessary to conduct empirical research independently.

課程目標 Course Objectives

Econometric Analysis (II) is a required course in the Ph.D. program. Ph.D. students must acquire some basic trainings in econometrics to conduct empirical analysis and forecasting based on economic theory. This course is also a distinguishing characteristic in the Ph.D. program.
