修別 Type	學程 Program	學分數/時間 Credit(s)/Hour(	(s)	3.0/3.0				
授課教師 Instructor	/周慧君							
先修課程 Prerequisite								
課程描述 Course Description								
This course is an introduction to the world of consumer behavior. The study of consumer behavior is about understanding what leads to individual purchase decisions that are important to business profitability. To understand individual purchases, we must understand basic psychological processes (such as memory, habit, identity, preference, and intuition). The discipline borrows from several social sciences, including psychology, sociology, and anthropology, to explain behavior in the marketplace. In this course, you will explore how these basic psychological processes influence consumption behavior, how consumption changes during one's life cycle, and how powerful cultural and subcultural influences are on consumers. This course will examine all of these concepts, drawing on academic research and industry practice. You will be encouraged to apply the course concepts to our discussions and case analyses that are of particular interest to you. These applications will be developed through participation (both online and in class) as well as through assignments. The course will have four modules: 1) foundations of consumer behavior, 2) internal influences on consumer behavior, 3) choosing and using products, and 4) consuming in their social and cultural settings. I hope this course can be fun - like a great dinner party conversation that lasts for 18 full weeks. Because we' re studying human behavior, we should all have a lot to contribute, both from our own experiences, as well as from the content of the materials we' 11 be reading each week. We' 11 start								
from scratch - teach you the basics of reading an educational book, give you the tools to become a discerning reader of social science research, and hopefully give you a whole new perspective for thinking about the wild ways we civilized humans behave.								
課程目標 Course Objectives								
1. To provide a basic understanding of the psychological, sociological, and economic processes influencing consumer choices.								

2. To examine implications of these factors for marketing.

3. To examine implications of these factors for consumer and societal well being.

4. To cultivate the capabilities of analyzing, summarizing, and integrating complex issues.
