課程名稱(英文) Course Name in English	Special Topics in Geology of National Parks						
科目代碼 Course Code	NRESM0520	系級 Department 碩士 & Year		開課單位 Course-Offering Department	自然資源與環境學系		
修別 Type	選修 Elective	學分數/時間 Credit(s)/Hour(s)		3.0/3.0			
授課教師 Instructor	/蔡金河						
先修課程 Prerequisite							

課程描述 Course Description

This course presents a geological survey of minerals/rocks, landforms, structures, and hazards in Taiwan's national parks. Each park's geological evolution through time will be explained with emphasis on the role of plate tectonics and surface processes. Field trip(s) to some of the national parks will be arranged. Students must finish a short essay on topics related to geology of a national park (or "geo-park") by the end of the semester. Non-major students are welcome.

課程目標 Course Objectives

- 1. To develop geologic background, concepts, and principles through study of selected national parks in Taiwan.
- 2. To examine the geologic framework and history, ancient/modern geologic processes, and factors influencing the present day landscape for each park area.
- 3. To finish an essay of introducing the geology of a national park by reading the geological literature.
