課程描述 Course Description

The primary goal of this course is for students to learn about accounting as an information development and communication system that supports decision-making. Students will be also exposed to the study of accounting principles and procedures such as journalizing, posting, and the preparation of financial statements in accordance with the international financial reporting system, and other selected topics.

課程目標 Course Objectives

This course introduces the fundamental concepts of financial accounting. Throughout the course, students will learn how to read and prepare financial statements, as well as how to utilize accounting information to improve decision-making. By the end of this course, students will achieve the following objectives:

- 1. Grasp Fundamental Concepts of Accounting: Students will develop a solid grasp of the ethics, principles, and assumptions of accounting.
- 2. Navigate the Accounting Cycle: The course will guide students through the accounting cycle, offering insights into each step involved in processing financial transactions. This knowledge will provide a holistic view of how financial data is identified, processed, and transformed into informative reports.
- 3. Comprehend Financial Statements: Students will learn to prepare primary financial statements such as income statement, retained earnings statement, and statement of financial position. Further, they will develop basic skills in analyzing these statements to glean insights into a company's financial health.
- 4. Explore the Measurement and Reporting of Statement of Financial Position Elements: This course provides an in-depth exploration of assets (e.g., receivables, plant assets, and investments), liabilities (e.g., current and non-current liabilities), and equity (e.g., share transactions and dividends). Specifically, the focus is on the measurement and reporting of these elements in financial statements in accordance with IFRS.
