課程描述 Course Description

Course Objectives and Description:

The purpose of this course is to extend the student's knowledge of security valuation by examining the structure, valuation, and uses of derivative contracts. The course develops a general, but rigorous framework for valuing futures and options contracts and shows the interrelations between these contract markets and the markets for the underlying securities. Specific examples are drawn from derivative contract markets on stocks, stock indexes, debt instruments, and foreign currencies.

Policy on Make-up Test & "Extra Credit":

You are expected to take tests and exam at the scheduled time. Make-up exams are rarely granted. Students who have to miss a test with legitimate reasons such as personal or family emergency may request in advance, in writing, for a make-up. Such written requests must be submitted before the scheduled test, and I will decide on the make-up date. I will not grant any "extra credit" for extra work; you have plenty opportunities to perform well in the class

Class Attendance and classroom etiquette:

Class participation is mandatory. A 5-point credit will be deducted from your "class attendance credit" for each additional class missed after one allowable absence. Class attendance is very important to your doing well in this class. Poor classroom etiquette will also result in the loss of credit.
