課程描述 Course Description					
This course introduces students to the fundamental theories, principles, and techniques of teaching English speaking in ESL/EFL contexts. It blends theoretical exploration with practical application, providing learners with opportunities to critically analyze established and emerging approaches to speaking instruction. Students will revisit prior knowledge while engaging with new concepts, fostering reflective thinking and the ability to make informed pedagogical decisions for diverse classrooms. Throughout the course, students will examine top-down and bottom-up approaches to speaking instruction, methods for adapting speaking materials to various age groups and proficiency levels, and strategies for designing interactive speaking activities at the individual, pair, group, and whole-class levels. Attention will also be given to principles of speaking assessment, including rubric design, task-based evaluation, and constructive feedback to enhance learners' communicative competence and pronunciation. By engaging in comparative analyses of traditional and contemporary teaching approaches, students will develop a well-balanced understanding of instructional design in speaking pedagogy. They will be encouraged to critique theoretical perspectives and integrate them into their own teaching practices, ultimately producing original, practical, and adaptable lesson plans for speaking classes. Upon successful completion of the course, students will be able to explain models and types of speaking, assemble and implement appropriate teaching methods and techniques, design authentic speaking tasks, and generate lesson plans tailored to specific contexts. This integration of theory and practice equips students with the knowledge, skills, and confidence to foster communicative growth in learners and to approach teaching speaking from a critical, reflective perspective.
